Filing Date	:NA	

(57) Abstract :

A conductive element (3) which can serve as capacitive sensing element comprises a conductive pad (9) comprising relatively low conductivity material such as carbon based ink and a conductive mesh (10) comprising relatively high conductivity material such as silver based ink underlying or overlying the pad to form a composite conductive element. A conductive element (5) which can serve as a connector to a capacitive sensing element comprises a set of elongate conductive tracks (13) and a set of conductive members (14) crossing said tracks.
